June 6th, 2020 - although fruitful studies have been conducted on carrier frequency offset cfo estimations in

linear coherent optical fiber munication systems there are few studies on cfo estimations and recoveries in the systems based on the nonlinear fourier transform nft although the cfo is originated from the linear frequency domain it definitely has effects on nonlinear spectra including the"detection estimation and modulation theory part i

May 25th, 2020 - the first edition of detection estimation and modulation theory part i enjoyed a long useful life however in the forty four years since its publication there have been a large number of changes 1 the basic detection and estimation theory has remained the same but numerous new results and algorithms have been obtained 2'
