*richard talbot newcastle university newcastle upon tyne*

*May 8th, 2020 - a read is counted each time someone views a publication  
summary such as the title abstract and list of authors clicks on a figure or views  
or downloads the full text'*

**'the anthropocen the invention of linear perspective as a  
May 22nd, 2020 - the beginning of the anthropocene has been inconclusively  
debated usually its starting point is linked to the moment in which some  
measurable human physical impact such as global carbon dioxide emissions  
increased in an unprecedented manner'**

**'fraser spiral illusion**

**May 12th, 2020 - the fraser spiral illusion is an optical illusion that was first  
described by the british psychologist sir james fraser 1863 1936 in 1908 the  
illusion is also known as the false spiral or by its original name the twisted  
cord illusion the overlapping black arc segments appear to form a spiral  
however the arcs are a series of concentric circles"manifold mirrors the  
crossing paths of the arts and**

**April 28th, 2020 - most works of art whether illustrative musical or literary  
are created subject to a set of constraints in many but not all cases these  
constraints have a mathematical nature for example the geometric  
transformations governing the canons of j s bach the various projection  
systems used in classical painting the catalog of symmetries found in islamic  
art or the rules concerning'**

---

**'oblique projection**

May 25th, 2020 - oblique projection is a simple type of technical drawing of graphical projection used for producing two dimensional images of three dimensional objects the objects are not in perspective so they do not correspond to any view of an object that can be obtained in practice but the technique does yield somewhat convincing and useful images oblique projection is mostly used in technical drawing"**the best writing on mathematics 2014 princeton university**
